

# ON TOUR

## with the remarkable Rallye

You're in a roomy, well laid out cabin — just 2 inches under 4 feet wide — beneath a one-piece full vision canopy. The dual controls come as standard equipment. That tried and tested American Continental engine is giving a lively power-plus-safety performance — Automatic synchronised slats make the Rallye stallproof. Here is real value for money — all metal strength — fast economical maintenance — levered suspension under-carriage — superb visibility — and low running cost. The Rallye is now on a national demonstration tour. Details of when and where the Rallye can be seen in your area may be obtained from your nearest representative. See this remarkable Rallye for yourself.

*Sole Australian Distributor:*

## DE HAVILLAND AIRCRAFT PTY. LTD.
