

What sort of people buy
PIPER Cherokee?

**The Royal Aero Club of N.S.W.
have placed orders for 5!**

They chose the Piper Cherokee — newest addition to the Piper range — a low-winged four-seater, all metal beauty capable of 135 m.p.h. President Mr. Peter Lloyd says the purchase is part of a programme to modernise the Club's fleet.

As a matter of fact this particular aircraft has been largely responsible for modernising light aircraft travel throughout the world. Its record speaks for itself — has done so since commencement of production — when over 500 were produced and sold within a few months, breaking all records.

What are the reasons that have made this plane emerge as a trend-setter above all others? We'd like to tell you. Just write, phone or send the coupon and we'll be glad to.

Please send me full details of Piper Cherokee
