Cessna

SUPER
SKYWAGON

Double doors 42" wide to handle big bulky cargo; 84 cubic ft. of space (102 cubic ft. with the cargo pack); over 930 lbs. of useful pay-load; 166 m.p.h. cruising speed; take off run of 675 feet; big new 285 h.p. engine . . . these are just some of the features that make the Cessna 206 1964's hardest working cargo-carrying light aircraft.

get up and GO

with the 150

NEW CESSNA 150

the world's easiest-to-fly aeroplane!

Cessna 150 has long held title to the world's best two-place aircraft. Now . . . "Omni-vision" for 360° all-round visibility; an extra 80 lbs. of useful load; provision for individual adjusting seats; and special children's seat . . . these are features which make 1964's 150 an even more wanted aeroplane. It's nippy . . . it's smart . . . it's very economical.

And there's no extra charge for the sheer fun of flying it!!

500 CESSNAS!

On October 4, 1963, Winchcombe Carson Ltd. took delivery of Cessna aircraft No. 54653.

An important day for Winchcombe Carson!

An even more important day for Rex Aviation Limited. Because this was an "extra-special" aeroplane.

Cessna No. 54653 became the 500th to be delivered by Rex Aviation Ltd. since the company's formation. And they are proud of that record.

Today 603 Cessnas are giving good and faithful service to businessmen, charter operators, pastoralists, aero-clubs throughout Australia. That's 37% of all light aircraft in Australia . . . *three times more* than any competitive aircraft.

What more proof is needed of Cessna's popularity, dependability, versatility?

CESSNA SKYMASTER the only twin with

C.L.T.

CENTRE LINE THRUST

Cessna introduces a complete new era in light aviation — twin-engine performance with single engine simplicity of operation. The 4/6 seat Skymaster will take off in 625 feet (shortest run of any twin), climb, if necessary, on either engine, cruise at 173 m.p.h. over a range of 1040 miles and land within 655 feet! What other twin in the world can give you all that?

PRICE £20,500 F.A.F.
Bankstown or Archerfield

think fast —

1962 CESSNA 210—Open throttle—260 h.p. lifts you into the air in 695 ft. Flip one lever—hydraulics tuck away undercarriage. Flip another—same for flaps. Trim for cruise—190 m.p.h. (same fuel as most aircraft at 160; credit fuel injection). High wing stability, better vision all round, more luggage space, luxurious 4-seat interior.

NEED WE SAY MORE?

Fly-away Bankstown price, standard equipped, reg. in Private Category —£12,700.

CESSNA BREAKS ALL RECORDS

75% of all purchasers of light aircraft in Australia — since 1955 — have chosen Cessna

Proof of the remarkable popularity of these world-famous aircraft is the fact that, since their introduction into Australia, three out of every four light aircraft sold in this country have been Cessnas. There are many reasons for this popularity. Cessna is backed by 50 years' experience in aircraft design and construction; every model is up-to-the-minute with the latest refinements; and Cessna has an unrivalled record for air safety. Most important is the fact that Cessna has proved itself so thoroughly in Australian conditions—as a willing workhorse in the country and as a valuable business asset for many companies. Cessna is backed in Australia by nationwide service and maintenance facilities. Practically anyone can fly a Cessna, it's as easy as driving a car—and flying costs are as little as 1/- a mile. We will be pleased to arrange a demonstration flight.
