AUSTRALIA'S NEW 300-m.p.h. WAR PLANE

AERIAL AGILITY is outstanding in the performance of the NA-16 monoplane, of which type 40 will be built in the new factory at Fishermen's Bend for R.A.A.F. use in advanced training. Left: The American machine which will serve as a model, tested in a power dive, in which it attained a speed of 300 m.p.h. Other pictures show it climbing steeply after the dive, and (top) cruising at high speed above Port Melbourne. (Photographs by Mr. J. T. Harrison, exclusive to The Sun.)
