

A20-502

How many old hands who served with No 5 Squadron on Bougainville during the war remember Wirraway BFO — otherwise known to her crews as "The Rocket." As can be seen here, The Rocket has been restored to her former glorious condition, by the meticulous workmanship of Melbourne aircraft engineers Dick Hourigan and Bob Lee, who used the facilities of Schutt Aviation. 502 has joined the fleet at the Warbirds Museum, Mildura — which is very appropriate because the museum is on the site of the well-known World War II No 2 O.T.U.
