

BEAUFORT BOMBER TURNS BUG HUNTER

THE DEPARTMENT OF AGRICULTURE has enlisted the aid of the R.A.A.F. for experiments to rid orchard country of the Rutherglen bug which is ravishing fruit crops. This week a Beaufort bomber went into action against the bugs at Cobram, where the pest has reached plague proportions. Here the machine is seen flying 100ft. above Mr. W. Young's orchard spraying a special solution, which contains D.D.T.
